

# Western Tourist Radio Station Guide (6 June 2008)

Tourist radio stations are designed to have a range of 3 to 5 Km from the transmitter. Look for the blue TOURIST RADIO road signs and tune to the FM channel shown. For best results, please follow these guidelines.

- We suggest that prior to your journey, you preset your car radio to our station frequencies.
- Car radios fitted with scanning or roaming facilities will not always pick up the tourist radio frequency. It is sometimes necessary to manually tune to the specific frequency. For the best results ensure that your antenna is at maximum height.
- **If you are staying in accommodation close to one of our transmitters, you might be able to listen in the comfort of your room, to plan your next day's activities. Or listen on line at**
